## PRESS RELEASE

September 2008

Ref:106

### CHELTON AWARDED DEVELOPMENT CONTRACT

Chelton is one of six companies globally to be awarded a development contract for a small antenna system (SAS) to replace existing GPS antennas on Apache and Blackhawk helicopters. The contract has been awarded by the United States Navy Space & Naval Warfare command (SPARWAR). The contract has a potential worth to Chelton/Cobham of \$5.7 US dollars over a 2 year phased period. Follow-on opportunity is in the order of \$100 million dollars. Chelton is working in collaboration with ERA, utilising novel technology to design and manufacture anti-jam GPS antennas and controllers. The new antenna footprint will be the size of current GPS antennas that lack anti-jam capability; therefore, they can be replaced comparatively easily on existing platforms and also fitted to aircraft previously too small for current CRPA/DACU technology.
